

ANH KHOA NGUYEN

FULL STACK DEVELOPER

anhkhoa14904@gmail.com | 0899 320 427 | Tan Binh, Ho Chi Minh City
Portfolio: anhkhoa.info | Github: [Nguyen Anh Khoa](#) | LinkedIn: [Anh Khoa Nguyen](#)

SUMMARY

- Full Stack Developer · 1 year professional experience · 6k+ hours coding · 40+ projects
- Passionate about software since 14 · Strong foundation with TypeScript, React.js, Next.js, Expo
- **AI-first engineer** · Claude Code, agent skills and MCP are part of how I design, build and ship
- Built, launched, and own an E-Commerce platform (12k+ orders, 3.5k+ customers) and a budgeting app (400+ users, App Store & Play Store) - independently
- I build for performance, reliability, and long-term scale - and I ship.

EDUCATION

Ho Chi Minh City University of Foreign Languages and Information Technology (HUFLIT)
Bachelor of Software Engineering

TECHNICAL SKILLS

TypeScript NextJS ReactJS NodeJS Expo React Native PostgreSQL MongoDB AWS
WebSocket Socket.IO Redis Bull Queue Prisma Docker Vercel REST GraphQL

AI ENGINEERING

Claude Code Agent Skills MCP Claude API OpenAI API Cursor Gstacks
Prompt Engineering Agentic Workflows LLM Integration OCR Pipelines AI Code Review

SOFT SKILLS

Agile Scrum English Communication (TOEIC 780) Time Management Product ownership AI-first mindset

PERSONAL PROJECTS

Deewas: Budgeting App with AI (Android, iOS)

02/2025 - current

- **Position:** Full Stack Developer (Owner)
- **Achievements:** Launched on Play Store, App Store and Web - 400+ real users, revenue from ads and subscriptions.
- **Description:** A smart finance application that helps users track spending, income, savings and gain insights through AI-powered analysis.
- **Technologies:** TypeScript, Expo, Next.js, Realm, MongoDB, OpenAI API, OCR, GCP, Vercel
- **Key Responsibilities & Highlights**
 - Sole engineer - designed and built Android, iOS, and web from scratch
 - Architected offline-first infrastructure (Realm) with seamless cloud sync on login

- Integrated an AI assistant with a customizable personality for smart financial insights
- Built an OCR pipeline to scan and extract data from receipts
- Implemented **12+** features - Budgets, Saving Goals, Wallets, Categories, Calendar, Search, and more
- Developed a Premium tier with subscription & ad monetization
- **Demo:** [App Store](#) | [Play Store](#) | [deewas.com](#)

Alpha Shop: E-commerce Website for Account Rental Services

08/2023 - current

- **Position:** Full Stack Developer (Owner)
- **Achievements:** 3.5k+ real users, 12k+ completed orders, and strong SEO rankings.
- **Description:** A full-featured e-commerce platform for account rental services, featuring a custom admin panel and built-in analytics dashboard.
- **Technologies:** ReactJS, NextJS, NodeJS, TypeScript, MongoDB, AWS, GCP, Vercel
- **Key Features & Responsibilities:**
 - Built entirely solo - every line of code, from frontend to backend, from scratch
 - Developed core features such as order management, payment processing, and customer management.
 - Scaled the system to support **3,500+** real customers and over **12,000+** completed orders.
- **Demo:** [anpha.shop](#)

WORK PROJECTS

Rikkeisoft: Enterprise WMS - AngularJS to Next.js Migration

4 months

- **Position:** Full Stack Developer
- **Description:** Modernization of a Japanese enterprise warehouse management system - replacing a legacy AngularJS frontend with a Next.js App Router app over a Laravel API.
- **Technologies:** Next.js, TypeScript, Turborepo, Zustand, TanStack Table, ShadCN UI, NextAuth, Zod, Orval, Vitest, Laravel, MySQL, Docker
- **Contributions**
 - Migrated inbound, outbound, picking and inspection screens from AngularJS to the App Router
 - Built shared screen-driven UI, hooks and types in a Turborepo monorepo used by the whole team
 - Implemented JWT authentication with NextAuth over a proxy layer to the Laravel API
 - Delivered bilingual (JA/EN) screens with next-intl and Zod-validated react-hook-form flows
 - Drove migration with Claude Code and repo-scoped agent skills to hold team conventions
 - Wrote Vitest unit tests and cleared automated code-review findings before every merge

Rikkeisoft: AI Medical Assistant

5 months

- **Position:** Full Stack Developer
- **Description:** An AI-powered medical platform integrating LLM capabilities into healthcare workflows.
- **Technologies:** Next.js, TypeScript, AWS, DynamoDB, S3, OpenAI, API, SSO, TailwindCSS, ShadCNUi
- **Contributions**
 - Served as main developer on the team - led core feature development and supported other members
 - Built and integrated LLM-powered features via OpenAI API for medical assistance workflows
 - Architected frontend with Next.js, ShadCN UI, and Tailwind CSS for a clean, scalable UI
 - Wrote unit tests and performed manual testing to ensure reliability and accuracy

Rikkeisoft: Enterprise Chat Platform

3 months

- **Position:** Full Stack Developer
- **Description:** An enterprise workspace for customer communication over Zalo and Chat Plus, with real-time support.
- **Technologies:** Node.js, ExpressJS, TypeScript, PostgreSQL, MongoDB, Redis, Bull Queue, Socket.IO, Docker
- **Contributions**
 - Integrated Zalo APIs - built webhook handlers and outbound messaging flows for customers
 - Engineered real-time chat infrastructure using WebSocket & Socket.IO
 - Improved backend performance through logic optimization and algorithm refinement
